Aluminium Doors

UPVC Sliding Windows

A Sliding window is of 2 track 2 panels or more that slide horizontally, to the left or right on the tracks. The sliding window can be wider and taller with the addition of sashes. The track on which the sash slides is slightly raised to prevent dust from settling in the track. A Slider window can also be offered in a combination of fixed and slider window joined with a coupler. We can even provide bug screen for a slider window by providing extra track.

UPVC Casement Windows

This window is also called a side hung window which opens inside or outside. The top hung is a window which opens from bottom to top. The above can also be offered in a combination of fixed and openable windows. The sash is connected to the outer frame by means of friction hinges or butt hinges

UPVC Tilt & Turn Windows

Tilts at an angle from the top like a bottom hung or opens sideways like a casement window. The tilt position is for ventilation. Both operations take place with a single handle with a specialized built in hardware.

Special UPVC Windows

Tilts at an angle from the top like a bottom hung or opens sideways like a casement window. The tilt position is for ventilation. Both operations take place with a single handle with a specialized built in hardware.

UPVC Casement Windows

We can also offer windows made with special weather resistant coloured laminations. The coloured laminations are imported from Germany.

UPVC Sliding Doors

A Slider Door is of 2 track 2 panels or more with or without mesh .A Slider Door can also be offered in a combination of fixed and slider window joined with a coupler. They are provided with multipoint locking system for added security. They can also be provided with a bug screen.

UPVC Casement Doors

Tilts at an angle from the top like a bottom hung or opens sideways like a casement window. The tilt position is for ventilation. Both operations take place with a single handle with a specialized built in hardware.

UPVC Slide & Fold Doors

The Slide and fold door is an full openable door with or without a flying mullion. The above Door open 100% and fold on one side or on both side.

Aluminium Windows & Doors
